<b>Language</b>	Typescript, JavaScript, Java, PHP, HTML, CSS
<b>CSS &amp; Design</b>	Material UI, TailwindCSS
<b>Database</b>	MySQL, MongoDB, DynamoDB, Snowflake and EventStoreDB
<b>Cloud</b>	AWS, Docker, Heroku, NX Monorepo and Vercel
<b>Other</b>	Github, Gitlab, Bitbucket, Jira, JetBrains Space, UML, Metabase, Sentry, GraphCMS, Strapi CMS, Notion, Stripe, Bitpay and Coinbase

## Experience

### **Full Stack Software Engineer - Remote**

APOLLO Insurance Inc. Vancouver

August 2022 - July 2025

- Architected the design and implementation of a rules engine using serverless architecture, reducing manual interventions by 40% and enabling flexible configuration at the database level.
- Led and participated in the hiring process, conducting interviews and providing ongoing support through weekly 1:1 mentorship, helping new team members resolve issues and acclimate quickly.
- Collaborated with cross-functional teams to develop a scalable SaaS product using Next.js and NestJS, effectively addressing insurance compliance challenges in the real estate industry and improving overall operational efficiency.
- Proactively monitored systems and took ownership of incidents, from investigation to deployment, using tools like Datadog, Sentry, and FullStory to ensure system reliability and stability.
- Optimized system performance by implementing third-party integrations and automating data consistency checks using ChatGPT, reducing errors by 20%.

## Full Stack Software Developer

Bluefin Enterprises Inc. Toronto

January 2019 - April 2022

Bluefin Enterprises Inc. Toronto (Internship)

August 2018 - December 2018

- Enforced modularity in React components using custom built node modules.
- Separated components of the app as microservices, deployed on AWS Lambda.
- Built Event Sourced credit-based payment system using Axon Framework.
- Led a centralized notification system design using Kafka across multiple maven apps.
- Implemented relational database design for notification system using MySQL.
- Individual contributor on a multi-tenant front-end app using React and Redux.
- Followed TDD on legacy Laravel app for internal ad conversion tracking tool.
- Shipped multiple server-side and static websites using Next.js and GatsbyJs.

## Full Stack Developer

Derman.ca. Toronto (Part Time)

January 2018 - April 2018

- Worked on a SaaS portal for Student Management System using Bootstrap, Laravel and MySQL.
- Learned productivity techniques like simplify-then-solve to write better code.
- Collaborated with remote developers in different time zones and delivered features timely.

## Web Developer

Siva Creative. Barrie (Internship)

September 2017 - December 2017

- Converted designer mockups into responsive WordPress websites, optimizing for SEO and performance.
- Developed and deployed an internal client management tool for an insurance company using Laravel and MySQL, hosted on DigitalOcean.
- Reviewed code and implemented improvements based on client feedback to enhance existing websites.

## Projects

### PointsLog Node Modules - `pl-oss/adapters` and `pl-oss/core`

Open Source

Developed open-source Node.js modules that simplify greenfield project setups by applying Domain-Driven Design (DDD), enabling faster focus on business logic instead of boilerplate code.

### Diamond Market

Private

May 2022 - August 2022

Designing a system for diamond brokers using Domain-Driven Design principles, collaborating closely with engineering and product teams to deliver an MVP, while leading the foundation for development practices and engineering culture.

### NFT Collection

Private

November 2021 - March 2022

Built and launched a production-ready NFT app using modern design patterns and technologies, improved developer experience with GraphQL, created a custom ownership contract, and implemented a secure payment system with Stripe, Bitpay, and Coinbase.

## **Education**

### **Diploma in Computer Programming**

*Georgian College - Barrie*

*January 2017 - December 2018*

- Learned modern technologies such as JavaScript, NodeJs, React, .NET MVC, .NET Core, IoT and advanced Java.

### **Bachelor's of Computer Science**

*K.S School of Business Management - Ahmedabad*

*June 2013 - May 2016*

- Learned programming fundamentals and algorithms, OOP with Java, HTML, CSS, PHP, VB .NET, software and system design.
